FOR IMMEDIATE RELEASE

New Brochure Names In-Floor Cabling Number One Choice

Flooring pioneer compares in-floor cable distribution vs. standard options

Ambridge, Pa., June 21, 2011—[H.H. Robertson Floor Systems](http://www.hhrb.com), a leading manufacturer of in-floor cable distribution systems, recently developed a brochure highlighting the advantages of their sustainable, aesthetic, cost-efficient cabling system. Targeting architects and building developers, the brochure provides a breadth of information on why in-floor cabling systems are superior, including health and safety benefits, sustainability, code compliance and cost savings.

“The H.H. Robertson system offers unique benefits and exceptional advantages for all types of building projects, from libraries to casinos,” said Kevin Daily, marketing manager. “In addition to the eye-catching photography of our systems in action, the new brochure demonstrates that they are the most economical and efficient flooring method available today.”

From preserving interiors by eliminating the need for power poles that block site lines to an impeccable fire safety record, H.H. Robertson delivers a cabling solution that effectively and efficiently meets the needs of building teams around the world. And because H.H. Robertson's in-floor cable distribution system also serves as the steel decking for steel frame construction, use of the system represents a significant net reduction in material usage, while enhancing the health, safety and welfare of building occupants.

H.H. Robertson systems also contain a high percentage of recycled content, are fully recyclable, minimize jobsite waste and conserve materials during the manufacturing process. In fact, its systems were recently awarded [Cradle to Cradle® Certification](#) at the Silver level by the [Cradle to Cradle Products Innovation Institute](#), which provides a framework for quality assessment.

To learn more about H.H. Robertson Flooring Systems, or to explore their online budget calculator for an estimate on a building project, visit www.HHRobertson.com.

[H.H. Robertson Floor Systems](#) is a division of CENTRIA and is located in Ambridge, Pa. The company produces cellular floor raceway systems used for wire distribution in offices, casinos, libraries and schools. For more information about H.H. Robertson Flooring Systems call 412.299.8074, e-mail info@HHRobertson.com or visit www.HHRobertson.com.

[CENTRIA](#) innovations in architectural metal wall and roof systems are helping building teams around the world reimagine the building envelope. From inspiration through installation, CENTRIA provides the highest level of expertise including service and support from an elite Dealer Network. Based in Pittsburgh (Moon Township, Pa.), our metal architectural systems are the perfect combination of science and aesthetics, offering advanced thermal and moisture protection, the broadest spectrum of design options, truly integrated components, and superior sustainability. We invite you to explore the limitless possibilities metal provides for your next project and to reimagine metal at www.CENTRIA.com/ReimagineMetal or find us on [Facebook](#).
